The Recitation Series for Semiconductor Education will enable faculty to enhance existing or new semiconductor classes with interactive simulations.

Simulations and animations can immerse students into “what if” scenarios and engage them in more active forms of learning, including explorations used in homework.

structure or p-n junction. When a photon of sufficient energy strikes the diode, it creates an electron-hole pair. This mechanism is also known as the inner photoelectric effect. If the absorption occurs in the junction's depletion region, or one diffusion length away from it, these carriers are swept from the junction by the built-in electric ...
