Defensive Behavior - an overview | ScienceDirect Topics

An animal's primary defenses are backed up by behaviors known as secondary defenses. The animal uses its secondary defenses when it confronts a predator. A gazelle

Access Free Animal Defenses Animal Behavior

uses secondary defenses when it stamps, stots, and runs away—or if it is caught by a cheetah or other predator.

Animal - Mrs. Anne C. Barnes' Class

Animals have many defense mechanisms to help them avoid predation. Many similar defenses have evolved in different species with slight variations. Camouflage, mimicry,

Access Free Animal Defenses Animal Behavior

and claws and teeth are extremely common in many species.

Others, like those of the sea cucumber, hairy frog and Malaysian ant are extremely unique.
