Auger electrons (AEs) are very low energy electrons that are emitted by radionuclides that decay by electron capture (e.g. 111In, 67Ga, 99mTc, 195mPt, 125I and 123I). This energy is deposited over nanometre-micrometre distances, resulting in high linear energy transfer (LET) that is potent for causing lethal damage in cancer cells. Thus, AE-emitting radiotherapeutic agents have great potential ...

Glucose and dextrose reach the blood as 100 percent glucose, making them ideal choices for hypoglycemia. Table sugar is made of one glucose molecule and one fructose molecule and has only half as much glucose as glucose tabs. Fruit juices, like orange juice, contain a bit less glucose, take longer to raise the glucose, and are often over-consumed.

The real danger of drinking wine, however, is that alcohol can cause your blood sugar to drop too low for up to 24 hours after imbibing. Under normal conditions, the hormone insulin helps regulate your blood sugar by enabling your cells to use blood sugar for energy 4. However, alcohol can cause your pancreas to release too much insulin.

How to Drink Wine & Keep Blood Sugar Low | Healthfully

augment anesthesia Anesthesiology The use of a systemic agent–eg, a hypnotic in addition to local anesthesia to enhance analgesic effects rather than subjecting a Pt to general anesthesia.
