universe according to Big Bang cosmology. The earliest stages of the universe's existence are estimated as taking place 13.8 billion years ago, with an uncertainty of around 21 million years at the 68% confidence level.

## **Chronology of the universe - Wikipedia**

## Read PDF Before The Beginning Our Universe And Others By Martin Rees

The relevant physics is still speculative---indeed, one motive for studying cosmology is that the early universe may offer the only real clues to the laws of nature at extreme exigencies. 2. The second stage runs from a millisecond to about 1 million years. It's an era where cautious empiricists feel more at home...
