Glossary of botanical terms - Wikipedia

Many common language terms used for fruit and seeds differ from botanical classifications. For example, in botany, a fruit is a ripened ovary or carpel that contains seeds; e.g., an apple, pomegranate, tomato or a pumpkin. A nut is a type of fruit (and not a seed), and a seed is a ripened ovule. In culinary language, a fruit is the sweet- or not sweet- (even sour-) tasting produce of a ...

Fruit - Wikipedia

Cultivar names are listed in title case, with each letter capitalised, and put in quotation marks. Often, this is the name of the person who bred or discovered the plant, or they might be named after another significant figure. Whereas the genus, species, var. and subsp. names are Latin, cultivar names are usually in a modern language.
