Cancer Management in Man | SpringerLink

Biological therapy for cancer is a type of treatment that uses the body's immune system to kill cancer cells. Biological therapy for cancer is used in the treatment of many types of cancer to prevent or slow tumor growth and to prevent the spread of cancer. Biological therapy for cancer often causes fewer toxic side effects than do other cancer ...

Biological therapy for cancer - Mayo Clinic

Cancer is a chronic disease, and like any other chronic medical condition, cancer patients have families, jobs, businesses and other commitments. Therefore, our aim is to cure the cancer if possible, and if not curable, then control the symptoms to improve quality of life and prolong the person's life by a few months (for example 2, 3, 6, 18 months or, if lucky, longer).
