Cartons, Crates and Corrugated Board: Handbook of Paper ...

From the paper mill, rolls of paper are transported to a corrugating (converting) plant. At the plant, layers of paper are crimped and glued to form corrugated cardboard, which is then cut, printed, folded, and glued to make the display or shipping boxes of most of the items at your local supermarket.

Corrugated Cardboard - What is it?

Many crates use cardboard components, and boxes can be made of wood or plastic just as much as cardboard. We also might assume that crates have "cleats" (the dimensional lumber, say 1x4's, attached to the plywood panels) and are assembled using nails or screws, while boxes might use adhesive or folds. But this, again, is a misconception.
