CHEMICAL CONTROL OF INSECT BEHAVIOUR 75 In the elm bark beetle, *Scolytus scolytus*, which is one of the major vectors of Dutch Elm disease, one of the components involved in the chemically mediated behaviour is provided by the host tree. It has been shown that both threo and erythro-4-methyl-3-heptanol (15) in proportions

## **Chemical Control of Insect Behaviour**

Many insect pest species now possess resistance to some or several types of insecticides, and few chemical control options exist for these pests. If all other integrated pest management tactics are unable to keep an insect pest population below an economic threshold, then use of an insecticide to control the pest and prevent economic loss is justified.
