The Drake L4B Amplifier was designed and built in the middle 1960's as a two piece unit. This included the (L4B) amplifier section and the (L4PS) high voltage power supply. The amplifier was a very rugged amplifier and designed as a two final tube amplifier using the 3-500 or similar tube.

Recently completed the fourth in a series of similarly constructed Drake L4B/8877 retrofits. All have upgraded, Hipersil, step start, higher voltage supplies. All the projects utilized basically the OEM Drake bandswitch tank circuit components and to this point have been well worth the effort making 2200w output.

Re: [Amps] Drake L4B/8877 Retrofit Problem

In the TR3 and early TR4 the sideband filter is composed of discrete crystals inside the square can. You might be able to get a replacement crystal cut, but finding the offending crystal in the first place will prove to be a bit challenging. Drake Tube Transmitters - ALC

Neue Drake 10A Relais sind leider nicht mehr zu bekommen. Als Ersatz habe ich ein Schrack Relais RM7320C4, 24V/16A ausfindig machen können. Bei dem 16A Relais sind die Kontaktflächen ausreichend groß und der schaltbare E-Magnet kräftig dimensioniert. Der Platz reichte für das neue und deutliche größere Relais für den Einbau auf die ...

Early Drake TR4 (bought in 2003) I restored this early version TR4 in 2003. It was in pretty poor condition with a badly marked front panel and some rust damage. The early (pre 1970) TR4s are very close to the even earlier TR3 and this particular radio has some features which date it before 1970, probably 1968. By sheer luck I managed to buy a ...

R.L. Drake - G3ZPS web pages

The Drake TR-4 is an HF amateur band transceiver covering 160 through 10 meters in seven 600 kHz ranges. Modes include USB, LSB, CW and AM. Input power is 300 watts PEP SSB, 260 watts AM/SSB. The solid-state VFO provides 1 kHz dial accuracy.

#167 Drake L 4B Quick Fix - YouTube

I bought a Drake L4B last summer. It was pretty ugly, someone had painted it white in fact, but it worked kinda. It was cheap enough and I always wanted one, so I figured why not. I spent the last few months going thru and thought I would show it off! Here is was the day I brought it home and tested it with my restored TR4.

The L4B does have a more heavy duty 29lb transformer vs the 23lb SB-220 transformer so I would chose the Drake. Al80A is 23lbs (AL80B 26lbs), but only one 3-500Z tube and the Amp Supply LK-500 uses a Peter Dahl hypersil type that is 23lbs, but hypersil efficiency performs like a 30lb standard IE lamination transformer.
