### Ford 361 Engine Specs

featured a full sump oil pan (8qts) and special pickup. The 361/391FT series featured 4\*ring dished cast aluminium pistons (7.4:1CR) and use short connecting rods. The 361 engine had full skirt pistons while 391 engines featurted slipper skirt pistons. However, I have seen slipper skirt pistons in some 361 engines.

forged steel rods, mechanical-lifter camshaft w/machined combustion chambers or cast chambers by 1959. By 1960, the 352 HP was available with an aluminum intake manifold producing approximately 360 hp. 360 cubic inch Used in Ford trucks

### FE Engines - FORD CLASSICS

The Ford 360 Truck engine was introduced in 1968 as the latest FE, or Ford-Edsel, V8 engine to power Ford trucks. Unlike the Ford 352 V8, the Ford 360 was used almost exclusively in the Ford Truck F-Series models; however, the cams used in the Ford 352 V8 and the Ford 390 V8 were placed in the Ford 360 to give the F-Series a similar, optimal performance of other Ford cars such as the late ...

Re: Ford FE 360, 361 and 390 engines... help? Brad, I've built an FE or three in my day. Fun engine, heavy engine, kinda pricey engine to find performance parts for BUT at least parts are out there for it. I'd look for a 390 as you did say you wanted to install a stroker kit. So this would be the cheapest route.

### Ford FE 360, 361 and 390 engines... help? - The BangShift ...

The 361 is a FT engine. The pertronix will fit the the distributor. I would install it along with a flamethrower coil and upgrade my plug wires. As far as exhaust improvements, just dual exhaust.

### 361 engine - Ford Truck Enthusiasts Forums

A series of Ford DOHC 12-valve inline-three engines with Twin Independent Variable Camshaft Timing (Ti-VCT), labelled as Fox (1.0 L), Duratec (1.1 L), Dragon (1.2 L and 1.5 L) and turbocharged 1.0 L and 1.5 L as EcoBoost.

### List of Ford engines - Wikipedia

Ford's 391 cubic inch big-block, manufactured from 1966 to 1978, is a member of the FT truck engine series — closely related to the more common FE-Series. The FT-Series consists of the 330, 361 and 391 cubic inch engines and have differences related to their truck usage. FE and FT engines are first identified in ...

### How to Identify a Ford 391 | It Still Runs

The Ford 351 Windsor was first introduced in 1969 and was quite a breakthrough in regards to the ways Ford produced its V8 engines. When Ford introduced the 302 to replace the 289 the engines were very similar and even used the same pistons.. The 351 Windsor was in a league of its own because of its heightened deck block, larger connecting rods and much "beefier" main bearing caps.
