Heeling Pump

The RBP250-3 and RBP300-3 are inline reversible single stage propeller pumps, driven by an electric motor. They are available in two versions for vertical or horizontal installation. The motor is connected to the pump through a flexible coupling. A 90° bevel gear reduces the motor speed.

tankers, product
carriers and tankers.

Framo pump

The Framo anti-heeling pump is of the in-line reversible propeller type, designed for maximum capacity in both directions. Only one crossover pipe between the heeling tanks is thus required. Low weight and compact design simplifies the installation.
