Kawasaki's DFI (Digital Fuel Injection) system used on the 750 Turbo is based upon that of the GPz1100. The DFI system computes the optimum fuel injection quantity according to the program stored in the memory of the con-trol unit and information collected by various sensors which detect engine oper-ating conditions. The sensors constantly

Kawasaki GPZ750 Turbo: review, history, specs - BikesWiki ...

To build the turbo, Kawasaki did not simply add fuel injection and a turbocharger to a standard GPz750 motorcycle engine. Some parts are exclusive to the "turbo", such as low-compression (7.8:1) pistons, stronger gearbox internals, a modified oil pan with an extra oil scavenge pump, a boost indicator, the characteristic aluminium "turbo"-spoiler, and a different Unitrak linkage (which gave it ...

Kawasaki GPZ750 Turbo - Wikipedia

jeffasaki wrote: Using any 750 Turbo parts (the only fuel injected GPz750) other than the throttle bodies is a bad idea, the stuff is 29-30 years old. and still works perfectly[/quote] As 30+ year old tech. Just think how brittle the plastic connectors are, and how many have seen computer failure.

Fuel Injectors & Main Jets for Kawasaki GPz750 for sale | eBay

If the vehicle has direct injection, it might need an induction service due to carbon deposits on the intake valves. The main reason is that fuel and added detergents are not hitting the back of the intake valves. Leaner mixtures and higher combustion pressures can make the problem worse over time.
