M = Nautical mile A nautical mile is equal to one degree of latitude standardized at 1852m/6076ft) and divided into 10 cables (ca) and each cable is 185m (200yd). Kn = Knot The unit of speed used at sea. One knot is one nautical mile per hour. m = Metre The standard metre is used to display depth and height on marine navigation charts.

Basic Marine Navigation Tutorial - Nautical Navigation Charts

When you're cruising along in your power boat, you're rarely alone on the water, so you need to know, and follow, boating rules. In boat-speak, you and your vessel either stand-on course because you have the right-of-way, or you give way to a vessel and let it pass first. The action you take depends on what you and the other vessel are doing.
