Leonardo Da Vinci Nature Studies

Leonardo da Vinci - Leonardo da Vinci - Anatomical studies and drawings: Leonardo's fascination with anatomical studies reveals a prevailing artistic interest of the time. In his own treatise Della pittura (1435; "On Painting"), theorist Leon Battista Alberti urged painters to construct the human figure as it exists in nature, supported by the skeleton and musculature, and only then ...

Leonardo da Vinci - Anatomical studies and drawings ...

For Leonardo, rational knowledge was based on the experience of the senses: man's role was to observe nature as attentively and completely as possible. Da Vinci's sketches of the plant and animal world suggest his love and respect for the works of nature, whether he was preparing studies for a larger painting or observing nature.
