Marine Protected Areas Network In

The Northern Shelf Marine Protected Area Network planning process aims to build a network of marine protected areas (MPAs) that will help to ensure that future generations will inherit the beauty and productivity of our Pacific Ocean. The success of conserving and protecting special marine areas is a shared responsibility.

A marine protected area (MPA) - MPA Network - Home

A Marine Protected Area Network or MPA network is a network of Marine Protected Areas or Marine Reserves.. A Marine Protected Area Network can be defined as "a collection of individual MPAs or reserves operating cooperatively and synergistically, at various spatial scales, and with a range of protection levels that are designed to meet objectives that a single reserve cannot achieve".

Marine Protected Areas (MPAs) involve the protective management of natural areas according to pre-defined management objectives. MPAs can be conserved for a number of reasons including economic resources, biodiversity conservation, and species protection. They are created by delineating zones with permitted and non-permitted uses within that zone.
