### Azure Communication Services - Communication APIs | Microsoft Azure

That is, you can connect virtual network interface cards to a virtual network to allow TCP/IP-based communications between network-enabled devices. Virtual machines connected to an Azure virtual network can connect to devices on the same virtual network, different virtual networks, the internet, or your own on-premises networks.

### Best practices for network security - Microsoft Azure

The network security group can be applied to a subnet, a Virtual NIC associated with an Azure VM, or both. The network security groups are essential to implement a correct flow control in the hub and in the spokes. The level of security afforded by the network security group is a function of which ports you open, and for what purpose.
