Department of Modern Languages and Linguistics

Linguistics is the scientific study of language. It involves the analysis of language form, language meaning, and language in context. Linguists traditionally analyse human language by observing an interplay between sound and meaning. Linguistics also deals with the social, cultural, historical, and political factors that influence language, through which linguistic and language-based context ...

Linguistics - Wikipedia

Linguistics is the scientific study of human language, from the sounds and gestures of speech up to the organization of words, sentences, and meaning. Linguistics is also concerned with the relationship between language and cognition, society, and history.

Department of Linguistics - Home | Department of Linguistics

This course allows students to study one modern language in depth together with linguistics, the study of language itself. Part of your course will consist of developing your practical language skills to a high level, and you will also explore the literature and culture of the relevant language (see Modern Languages).

Modern Languages and Linguistics | University of Oxford

Simply defined, linguistics is the scientific study of language. Though various types of language studies (including grammar and rhetoric) can be traced back over 2,500 years, the era of modern linguistics is barely two centuries old.
