PixelScroll lists free Kindle eBooks every day that each includes their genre listing, synopsis, and cover. PixelScroll also lists all kinds of other free goodies like free music, videos, and apps.

Nikon Digital Flash Guide

Nikon's current digital camera flash system, i-TTL, is very good. It's in the D2X, D200, D70, and D50. There are only two gotchas: 1.) The preflashes can be visible and make some subjects blink for every shot. Whoops! Use the flash exposure lock feature if your camera has it to eliminate the preflashes. 2.)

Nikon Flash Guide - Ken Rockwell

Using an optional flash unit such as the Nikon SB-400 or SB-900 makes it possible to achieve optimal exposure at greater distances than with the built-in flash. We recommend using an optional flash unit when taking photographs at weddings and in other situations in which you may frequently be taking photographs at a distance from the subject. Subject photographed at short range with a low-power (low guide number) flash

Flash Level (Guide Number) - Nikon | Imaging Products

If the light from the flash is too bright, photographs will be too bright (overexposed) ; if it is not bright enough, photographs will be too dark (underexposed). Immediately before the shutter is released, the built-in flash units in Nikon DSLR Cameras emit low-intensity flashes (monitor pre-flashes) to measure the amount of light reflected from the subject.

Nikon | Imaging Products | DSLR Camera Basics | Flash Mode

TTL-FP: Focal Plane flash: permits flash photography with a shutter speed faster than the camera sync speed, which is typically 1/250 sec or 1/200 sec on Nikon DSLRs. In the * TTL -FP mode: the flash uses a sequence of pulse flashes to get round the sync speed limitation so that it can sync with as fast as 1/8000 sec but at reduced flash power.

Guide to Nikon TTL Flashes - Photo.net - Articles

Godox TT685N Thinklite TTL Flash for Nikon. The Godox TT685N packs in a lot of power at a reasonable price point. The flash has a 197-foot guide number and a zoom range of 14-200mm. The Godox flash still supports Nikon's TTL system and even high-speed sync, as well as a manual flash from 1/128 to 1/1.

Best Flash for Nikon DSLR Cameras in 2020

1. Set the zoom function of the flash on an Odin II Receiver to Auto or AZoom. 2. Setting Odin II TCU: 1) Press the Zoom Button and enter to the Flash Zoom Adjustment Screen. 2) Press Flash Group Button for the group to be adjusted. 3) Turn the to adjust the zoom to manual value (20-200). 4) Repeat to adjust the zoom setting for each group.

Odin II TTL Flash Trigger for Nikon Quick Start Guide

The TTL feature of a Nikon dedicated flash will only work with Nikon, however, it could possibly still be used in manual mode. In a nutshell, TTL is the way that the camera sets the exposure and flash intensity automatically by firing a nearly imperceptible pre-flash, taking an exposure reading, and adjusting settings accordingly.

Beginners Guide to Using TTL Off-Camera Flash

In order to understand how a flash guide number is calculated, you first have to understand two common digital SLR camera settings: aperture and ISO. Aperture is the width of the opening in the camera's lens - a wider aperture allows more light to land on the camera's sensor.

Find the right flash with our Nikon Speedlight comparison tool. When you compare Nikon flashes, select from features like wireless and radio control, bounce lighting, LED video lighting, and built-in cooling. Speedlight flashes give you Nikon's trusted compatibility, reliability, ...

DSLR and Mirrorless Camera Flashes | Nikon

Nikon's most advanced Speedlight with a guide number of 184 feet (at ISO 100 at 105mm zoom-head position). Operates a stand-alone Speedlight, wireless Speedlight Commander or wireless remote unit . Advanced wireless control provides fully automatic and independent control of an unlimited number of SB-900, SB-800, SB-600 and SB-R200 Speedlights.

SB-800 AF Speedlight | Nikon

The built-in flash unit on the Nikon D80 is quite similar to the flash units on many other digital SLR cameras. It pops up far away from the camera body, which helps to prevent red-eye. While it will certainly help light a scene in a pinch, I would recommend that you go out and find a low-price external flash unit if you're going to be taking a lot of flash photography.
