Wikipedia

Nissan Navara vehicles sold prior to June 2006, had ignition relay problems. The relay contacts within the power distribution module shown the tendency to become contaminated with a build-up of silicon dioxide; this could cause poor conduction at the relay contacts and result in the engine stalling and failing to restart.

worn or broken timing chain can cause catastrophic engine failure, in some cases costing up to \$10,000 to repair. The Cause of the Problem - The early YD engines (YD22) were fitted with a duplex style timing chain from factory, timing chain failures in these engines were very rare. When they introduced the YD25 engine, that Duplex chain was replaced
