Continue each number pattern and answer the questions. 2nd through 4th Grades. View PDF. Number Line Patterns #1. Write the missing numbers on each number line. Kindergarten and 1st Grade. View PDF. Advanced (4+) Number Patterns. Continue the number patterns and describe the rule. The numbers on this worksheet are in the thousands.

Number Pattern Worksheets

The Fibonacci Sequence is found by adding the two numbers before it together. The 2 is found by adding the two numbers before it (1+1) The 21 is found by adding the two numbers before it (8+13) The next number in the sequence above would be 55 (21+34) Can you figure out the next few numbers? Other Sequences. There are lots more!

Number Sequences - Square, Cube and Fibonacci

You need to carefully analyze the rules used and follow different hypotheses to get your answer. Let us analyze this number pattern through an example. Like, there is a number series of 1, 4, 7, 10, 13..... So the next numbers given in solutions would be 16, 19, 22, and 25. Here, the right answer is 16 because in this series the numbers jump 3 ...

IQ Test Series and Number Patterns IQ Test Practice Questions

Working with number patterns is an very useful skill for solving many types of problem. Identifying a pattern when you look at individual examples helps you to generalize and find a broader solution to a problem.

Generating Number Patterns | Helping With Math

Number Patterns. Recognize abstract patterns in number sequences. Finding the pattern in numbers is a skill that lays the foundation for data analysis abilities later. The numbers in these series range from simple addition or subtraction patterns (at the easy level) to rolling mixed computations (at the complex level).

Number Patterns - WorksheetWorks.com

The canonical Fibonacci pattern is "0, 1, 1, 2, 3, 5, 8..." and similar, but you will often see number pattern problems that start with a different base and use the same rule. Other Number Patterns. Other types of number patterns that may occur are simply lists of common numbers, for example odds or evens, primes, composites, times.
