Brahe, Johannes Kepler, Galileo Galilei, and Sir Isaac Newton.

Origin of Modern Astronomy - Pearson Education

The European astronomers drew first on Greek astronomy, as translated from Arabic, before acquiring direct access to the classics of Greek science. Thus, modern astronomy is part of a continuous tradition, now almost 4,000 years long, that cuts across multiple cultures and languages. This article focuses on this central story line.

Astronomy - History of astronomy | Britannica

The ancients knew much about the cosmos (heavens), but their ideas about what was responsible for the observations were often strange by present standards. Modern astronomy is characterized by two features that distinguish it from the astronomy-astrology that came before it: 1. A dependence on quantitative
