Pregnant women with chronic high blood pressure are at an increased risk for a low birth weight infant, preterm delivery, kidney damage, and preeclampsia during pregnancy. Polycystic ovary syndrome...

### Pregnancy Risk Factors: Age, Weight, Preexisting ...

Abstract. In this chapter we examine midwives' discourses in relationship to risk and place of birth. We analyse the ways in which these discourses take place at the intersection of two discrete imperatives: to provide pregnant women with choice over where and how they give birth; and to protect mothers and babies from harm.

### Choice, Risk, and Moral Judgment: Using Discourse Analysis ...

result of the current risk approach to maternity care (RCM, 2003). Symon (2006) suggests a woman needs to cooperate with a technocratic approach to maternity care, in order that she maximises her chances of avoiding disaster. He also describes a Risk-Choice paradox. Risk management has given society and professionals a false sense of

### Choice, informed consent and risk- managing women's care ...

Some women have an intuitive feeling for their baby's growth and wellbeing, while others need the reassurance of technology.Women lead complex lives and often the consideration of a procedure or risk is put into this context, such as the desire to recover quickly after a normal birth, as opposed to the choice of caesarean section (CS) for a busy professional who likes the control of an elective CS that can be slotted into their diary.

Option A: Maternal age is not a risk factor until age 35, when the incidence of chromosomal defects increases. Option C: Maternal exposure to rubella during the first trimester may cause congenital defects. Option D: Although a history or preterm labor may place the patient at risk for preterm labor, it does not correlate with genetic defects. 5.
