### **Separate lives : why siblings are so different (Book, 1990 ...**

Siblings play a unique role in one another's lives that simulates the companionship of parents as well as the influence and assistance of friends. Because siblings often grow up in the same household, they have a large amount of exposure to one another, like other members of the immediate family .

### **Sibling relationship - Wikipedia**

The sibling agreement correlations are .55, .73, and .60 concerning which sibling's peer group was more college oriented, delinquent, and popular, respectively. Siblings also agree substantially as to which sibling was more jealous ( $r = .56$ ) and which sibling displayed more caretaking ( $r = .56$ ).

### **Why are children in the same family so different from one ...**

The distinction between caring about someone and caring for someone develops hesitantly into a conflict about lives not lived. The absence of the siblings' mother, her affair and consequent abandoning of the family – a starting point for one of the sister's many arguments – is a narrative arc that never seems to pay off.
