Okay, I found this searching for MY problem. I have a Sony laptop (mistake #1). The "m" key seems to be stuck...when I boot up, I have to hit space-m-space-m-space-m over and over to get rid of a black screen w/ blinking cursor and a loud beeping noise.

My Shift Key is Stuck. How Do I Unstick It? - Ask Leo!

Ok, after searching the web for a while I found a solution to my problem. Just follow these steps to diagnose and resolve your issue: Get pid that is listening port 80: netstat -nao | find ":80" Open task manager, go to processes tab and check "PID" in Menu/View/Select Columns..., then look for the process using the PID found in last step.. If it is a normal application or IIS, disable it ...
