### Stubborn Fat Solution Results

A recent New York Times article (see sources below this article) revealed the connection between waist size and longevity in the results of a research study by epidemiologist Dr. Eric Jacobs.. The doctor and his research team tracked 48,500 men and 56,343 women, over age 50, from 1997 to 2006. What they discovered is fascinating. The upshot is: having a large waist size doubles the risk of dying.

### Proven Ways to Lose Stubborn Belly Fat After Age 50 - Over Fifty and Fit

Cryolipolysis is a method intended to remove fat by freezing. It involves controlled application of cooling within the temperature range of –11 to +5 °C (+12.2 to +41 °F) for the localized reduction of fat deposits, intended to reshape the contours of the body. The degree of exposure to cooling causes cell death of subcutaneous fat tissue, without apparent damage to the overlying skin.
