Student Exploration Estimating Population Size

The

“capture/recapture” method lets you estimate the size of a population. To apply this to a fish pond, first catch and tag some fish. (This is the “capture” part.) Then release the tagged fish into the pond and wait. Later, catch a second group of fish. (This is

Download Ebook Student

the “recapture” part.)

Student Exploration: Estimating Population Size Answer Key (ANSWER KEY)

Estimating Population Size. Adjust the number of fish in a lake to be tagged and the number of fish to be recaptured. Use the number of tagged fish in the catch to estimate the number of fish in the lake. ... In the file, click on the

Population Size
Answer Key

In the Estimating Population Size Gizmo, students use the “mark and capture” method along with ratios and proportions to estimate the population size of fish in a pond. It’s the perfect Gizmo to connect math and science to real-world scenarios. The Estimating Population Size Gizmo is now available in HTML5. In this new format, the Gizmo can be used on

Estimating Population
Size - Teacher Guide.

Original Document:

Estimating Population
Size. Teacher Notes:

You will need to
prepare the
populations ahead of
time. You can put
marbles, beads,
macaroni, or other
small objects in bags.
The numbers will work
best if the bags contain
between 30 and 100
objects.
