Value Stream Mapping Net Objectives

Value Stream Mapping is an activity that catalogs the steps in the work producing a product or delivering a service. It reveals where the interfaces are between activities, as well as the times involved in and between process steps. Understanding the value stream

Value Stream Mapping - Net Objectives Portal

The value stream map is a Lean tool that practitioners use to analyze the value stream. Value stream mapping involves drawing pictures of the process streams and then using them to look for waste. The focus is on improving the total time from beginning to end of the entire stream while maintaining this speed in the future (that is, you cannot take shortcuts now at the expense of future development). One of the great benefits of value stream mapping is that it shows the entire picture.
