Let's learn what is integration before understanding the concept of Integration by Substitution. The integration of a function f(x) is given by F(x) and it is represented by:  $\int f(x)dx = F(x) + C$ . Here R.H.S. of the equation means integral of f(x) with respect to x. F(x) is called anti-derivative or primitive. f(x) is called the integrand.

In mathematics, integration by parts is a special method of integration when two functions are multiplied together. This method is used when the integrals are difficult to evaluate. In this method, the integration by parts formula moves the product out of the equation, so that the integral can be evaluated easily.
